PROFESSIONAL EXPERIENCE

iOS Tech Lead

UOB, Singapore (via HCLTech & Optimum Solutions)

2023-Present

Singapore

- Lead the engineering of UOB TMRW modular iOS app; boosted scalability 30% across 4 markets (SG,TH,ID,MY) for large user base.
- In Agile/Scrum, collaborated cross-functionally (product, design, backend) to launch features; improved UX & cut dev time 20%.
- Architected a scalable solution using VIP and modular design (Cocoapods), cutting feature update time 25% achieved 40% code reuse.
- Optimized Jenkins CI/CD, cutting build time 50%; streamlined dev (Bitbucket, JIRA, SonarQube) for improved code quality.

Senior Software Engineer

Recro (Client: Ekincare, Hyderabad)

2022

Bengaluru, India

- Led iOS development for an app with 2M+ users, mentoring 3 engineers and driving architectural decisions.
- Cut build times by 50% through modular design, boosting development efficiency.

Senior Software Engineer

Smart Controls India Ltd. (Zeppelin Group, Germany)

2019-2021

Bengaluru, India

- Architected and built the Klickcheck web application from concept to launch in 2 months using React and Redux.
- Collaborated in a cross-functional team to develop the company's mobile suite, contributing to both the native iOS and React applications.

Software Engineer

Fingent

2016-2019

Cochin, India

- Self-taught and delivered multiple iOS applications from concept to launch, managing the full development lifecycle.

EDUCATION

iOS Lead Essentials (Dec 2021-Dec 2023)

Essential Developer Academy by Caio & Mike

Training program to become complete senior iOS developer

B.Tech Computer Science & Engineering (2012-2016)

University of Calicut

TECHNICAL SKILLS

Core Skills: React Native, TypeScript, JavaScript, Zustand, Expo, Swift

Architecture: Modular Design, Clean Architecture, TDD, VIP, MVVM

Methodologies: Agile/Scrum, CI/CD (Jenkins, Fastlane), Git

Platforms & APIs: iOS, Android, REST APIs, WebSockets, Google Maps

PROJECTS

Signal - Real-Time Crypto Dashboard

React Native, TypeScript, Expo, Zustand, React Navigation, WebSockets

- Developed a production-ready crypto tracking app in a public, sub-11-hour development challenge to demonstrate rapid, high-quality execution.
- Architected the global state using Zustand to solve complex UI bugs like stale state and infinite render loops, ensuring data consistency.
- Engineered a resilient data layer using WebSockets for live data and implemented a client-side caching strategy to mitigate API rate-limit errors.
- Leveraged the Gemini CLI for AI-assisted development, accelerating boilerplate generation to focus on core architectural problem-solving.
- GitHub : github.com/areekaras/signal-crypto-dashboard
- Public Chronicle : shibiliareekara.com

UOB TMRW SG/TH/ID/MY • iPhone

Swift, VIP, Modular Architecture

- Developed core features for the UOB TMRW app, enhancing security and user experience for millions across 4 countries.

EssentialFeed • iPhone (Modular design)

Swift, TDD, MVC, MVP, MVVM

- Mastered advanced modular design and TDD principles through the intensive Essential Developer program.

Diverse GitHub Portfolio (github.com/areekaras)

20+ projects demonstrating TDD, BDD, DDD, Design Patterns, various iOS Architectures (VIPER, MVVM-C), and Data Structure and Algorithms.
